

Media Release: 10th May 2016

St Leonard's Primary School & Newly Weds Deconstruct Fish Fingers!

As part of its commitment to the local communities surrounding the various sites around the UK, Newly Weds Foods Banbury, a world leader in the manufacture of food coatings and ingredients, has been assisting the children from St Leonard's Primary School with their Year 2 'Learn about Food' topic.

The children had the opportunity to learn about the products produced at the Banbury site, the origins of food via an interactive presentation and to deconstruct a fish finger under the guidance of Plant Manager, John Butcher and Senior Research & Development Manager, Libby Henry.

"It has been great fun and a pleasure to work with the children from St Leonard's. Everyone concerned enjoyed the practical 'hands on' approach and we look forward to sharing our knowledge and passion within our community." Says Libby Henry.

Various other community initiatives are in the pipeline and Newly Weds looks forward to educating and raising awareness of what the company does in the near future.
