

NWF's Christmas Charity Events Raise Four Figure Sum!

Newly Weds Foods continues its initiative to support a number of charities, both locally and nationally. The most recent event saw NWF's support The Pituitary Foundation and MNDA – Motor Neurone Disease Association.

NWF is very proud to announce a grand total of £1,417.82 has been raised which shall be split between the two Charities. Funds were raised through a combination of a prize Christmas raffle, cake sale and a breakfast morning, consisting of bacon and sausage sandwiches! All of this was voluntarily undertaken by members of staff across several departments.

It is estimated that there are approximately 70,000 people with a pituitary condition in the UK. The foundation offers valuable support for sufferers as well as a wealth of information and networking for those with the condition. The charity uses funds to support campaigns raising awareness of issues facing pituitary patients, their families and carers.

Motor neurone disease is a progressive disease that attacks the motor neurones, or nerves, in the brain and spinal cord. MNDA charity focusses on care, research and campaigns to raise awareness.

Thanks must go to everyone who contributed towards this fantastic total, but a special mention goes to the Newly Weds Charity Group, who organised the running of each event seamlessly, as well as the volunteers who gave up their own time to cook sandwiches and bake cakes for the two sales.

Further information on the two can be found at:
